

Carl F. Driscoll, DDS

About the speaker:

Dr. Carl F. Driscoll currently serves as a Professor at the University of Maryland Dental School and as Director of the Prosthodontic Residency. Dr. Driscoll is a Diplomate of the American Board of Prosthodontics and a Fellow of the American College of Prosthodontists (ACP). Dr. Driscoll has served as President of the American Academy of Fixed Prosthodontics, President of the American Board of Prosthodontics, and as President of the ACP. He has been awarded both the Garver-Staffanou Award (for outstanding service as a program director) and Moulton Award (for outstanding contributions to fixed prosthodontics) from the American Academy of Fixed Prosthodontics. Dr. Driscoll has given over 350 presentations nationally and internationally and has authored over 75 publications. He recently co-published the book “Clinical Applications of Digital Dental Technology” with his colleague Dr. Radi Masri.

Course description:

Dr. Driscoll will demonstrate the importance of diagnosis, treatment planning, and execution of patient care of fixed prosthodontic patients through multiple presentations of clinical cases. With over 40 years of clinical experience, he will lead you through the principles that must be applied to those difficult patients that are normally referred to the Prosthodontist or for those patients, whose name you hate to see on the appointment book. Clinical cases will include all facets of fixed prosthodontics. A rewarding fast paced, high energy, very informative, and entertaining time awaits the participant of this course.

Objectives for this course:

1. To name tips and techniques that make fixed prosthodontics easier, more predictable, enjoyable, and more productive.
2. To utilize methods to differentiate the simple fixed solutions from the unrealistic expectations of patients.
3. To describe clinical techniques to make implant treatment less stressful to you and the patient

Benefits of attending

- Actual information you can put to use the next Monday
- Learning how to say no to patients’ unrealistic expectations
- Learning how to stay out of trouble in fixed prosthodontics
- Making your prosthodontics more enjoyable and profitable
